

Digital Leaders

Autumn Term Newsletter

We are the Digital Leaders. We work with everyone at school (even the adults) to make sure that technology is being used safely and to help make our learning even better. We can't wait to share all of the amazing ways that technology is used at school.

- S SAFE** Keep your personal information safe. When chatting or posting online don't give away things like your full name, password or home address. Remember personal information can be seen in images and videos you share too. Keep them safe to keep yourself safe.
- M MEET** Meeting up with someone you only know online, even a friend of a friend, can be dangerous as this person is still a stranger. If someone you only know online ever asks you to meet up, for personal information or for photos/videos of you then tell an adult straight away and report them together on www.thinkuknow.co.uk.
- A ACCEPTING** Think carefully before you click on or open something online (e.g. links, adverts, friend requests, photos) as you never know where they may lead to or they may contain viruses. Do not accept something if you are unsure of who the person is or what they've sent you.
- R RELIABLE** You cannot trust everything you see online as some things can be out of date, inaccurate or not entirely true. To find reliable information compare at least three different websites, check in books and talk to someone about what you have found.
- T TELL** Tell a trusted adult if something or someone ever makes you feel upset, worried or confused. This could be if you or someone you know is being bullied online. There are lots of people who will be able to help you like your teachers, parents, carers or contact Childline – 0800 11 11 or www.childline.org.uk
- BE SMART WITH A HEART** Remember to always be smart with a heart by being kind and respectful to others online. Make the internet a better place by helping your friends if they are worried or upset by anything that happens online.

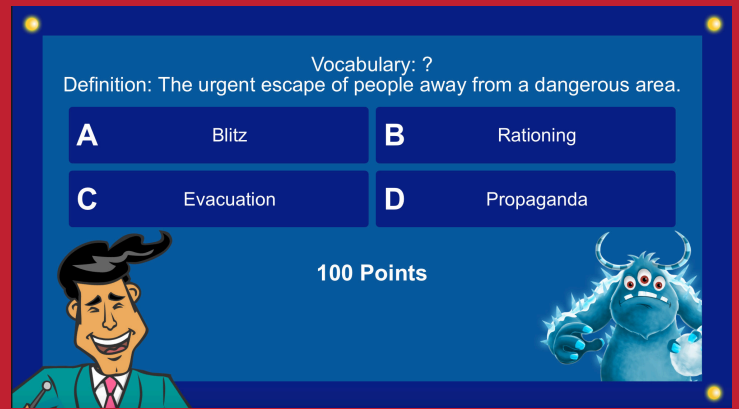

We all know that it is really important to keep ourselves safe online and the SMART Rules help us to do this. Our SMART Rules are displayed in every classroom, on our iPad trolleys and we even have them on our iPad lockscreens. There are lots of other things that help to keep us safe online at school, such as being able to use the Whisper Button if we ever have a problem. Most importantly, there are lots of trusted adults that we can speak to if we're ever worried or need some advice.

Safer Internet Day 7th February 2023

SMART Lumio

Lumio allows us to use our iPads throughout lots of different lessons. There are so many incredible features but we particularly love the quizzes, match-up games, word searches and the ability to switch to Student-paced mode. This means that we can go back through the lesson slides to see what we did earlier, or move on as soon as we're ready.

Keynote

Keynote is a presentation app that allows us to show the most important ideas and vocabulary from what we have learned. Once we have created a Keynote, we then develop our communication skills by presenting in front of different classes and adults around school. Below are some of the incredible Keynote pages that have been created around school this term:
