Digital Leaders

Spring Term Newsletter

We are the Digital Leaders. We've been working with everyone at school (even the adults) to make sure that technology is being used safely and to help make our learning even better. We can't wait to share all of the amazing ways that we use technology at school.

This term, we have celebrated Safer Internet Day and the theme 'Want to talk about it? Making space for conversations about life online.' Our assembly shared lots of different ways that we can encourage open and honest conversations and we reminded everyone about our school homepage Whisper Button which we can use to share any concerns. We finished by talking about some common apps and games and how these all have age ratings to help keep us safe. We hope that our celebration of Safer Internet Day helps everyone to talk about life online all year round.

SMART Lumio

Lumio helps us to learn through different game-based activities on our iPads within our lessons. We have loved seeing Lumio used in every class this term but it has been particularly enjoyable to support children in Year 1 as they used Lumio for the first time. They loved the matching activities and monster quizzes and were whizzes on their iPads.

World Book Day Digital Writing

To celebrate the fantastic writing that happens across our school, we have all used the Pages app and our word processing skills to create a whole-school digital book - Sandford Hill Writing Rocks. The book shared writing from each year group and was shared with our whole community as part of our World Book Day Celebrations. Download our book from the Apple Book Store.
